

DYNAMO™ 500

DESIGN
SERIES

STEREO/HOME THEATER SUBWOOFER

AFFORDABLE LOW-FREQUENCY ACCURACY

No other subwoofer offers Dynamo 500's combination of bass extension, power, and detail at such an affordable price. Perfect for either home theater or stereo applications, the Dynamo 500 is solidly built with high-density materials to minimize cabinet resonance and provide a foundation for the high-output 10-inch woofer and high-current 120-watt, 360-watt peak amplifier. Additionally, dual rear-mounted low-turbulence ports maximize bass output while minimizing port induced distortions.

Whether you are looking for high performance bass to enhance your music experience or take your home theater system to the next level, a new Dynamo family subwoofer should be at the top of your list.

<i>Frequency Response</i>	29–200 Hz ± 3dB
<i>Low Pass Filter Frequencies</i>	50–200Hz
